

Yehya Moustafa

Senior Product Designer | Mobile, Web & SaaS Platforms

Location: Beirut, Lebanon (UTC+3) / **Mobile:** +96170701178

Mail: yehyamoustafa2026@gmail.com / **Portfolio:** <https://www.yehya.site/>

Summary

Senior Product Designer with 8+ years of experience bridging elite visual aesthetics with scalable, user-centered digital products across SaaS, mobile, and web platforms. Leverages a unique dual background in Graphic Design and Computer Science to collaborate seamlessly with engineering teams, owning end-to-end execution—from UX strategy and design systems to high-fidelity UI and front-end implementation.

Experience

Numbase Group - Senior Product Designer (2024 - Present)

- Led end-to-end product design for enterprise SaaS and fintech platforms, optimizing complex user flows to increase task completion speed and user onboarding activation by 20%.
- Architected and governed multi-brand Figma design systems utilizing advanced variables, tokens, and auto-layout, reducing developer handoff time and design-to-code QA cycles by 30%.
- Partnered with product leads and engineers to translate complex backend system requirements into intuitive UI patterns, leveraging a dual Computer Science background to ensure 100% technical feasibility.
- Ran CRO and UX optimizations across core platform dashboards, leveraging session recordings and user telemetry to eliminate workflow friction points.

DS2 - Senior Product Designer (2023 - 2024)

- Designed and shipped scalable web and mobile interfaces, delivering responsive design systems that cut cross-device bug reports during engineering QA.
- Produced high-fidelity interactive prototypes and detailed handoff documentation in Figma, bridging the gap between product strategy and front-end development.
- Collaborated directly with executive stakeholders to convert business requirements into modern, conversion-driven visual experiences.

AI Qabass - Product Designer (2018 - 2023)

- Designed end-to-end digital brand experiences and responsive web layouts for commercial and media clients.
- Established visual hierarchy systems, typography scales, and digital component libraries across multi-channel campaigns.
- Partnered with cross-functional teams to translate brand identities into high-converting digital interfaces

Freelancing — Product Designer - Web Designer (2017 - Present)

- Partner with global startups to design end-to-end mobile and web apps, including an EdTech mobile platform that achieved 10,000+ downloads and a 4.9 Play Store rating.
- Reduced user drop-off dramatically by replacing fragmented communication channels with a structured, multi-step booking stepper.
- Evolved offerings over 8 years from brand identity to complex design systems, wireframing, interactive prototyping, and developer QA.

Core Competencies & Tools

- **Product & UX Strategy:** User Research, CRO (Conversion Rate Optimization), A/B Testing, Information Architecture, Wireframing, User Onboarding, Usability Testing
- **UI & Systems Design:** High-Fidelity UI, Figma Design Systems, Design Tokens, Variables, Component Governance, Mobile (iOS/Android), Web & SaaS Platforms
- **Technical & Handoff:** Front-End Architecture (HTML/CSS/JS knowledge), Developer Handoff, Design-to-Code QA, Technical Feasibility
- **Tools & AI Stack:** Figma, Dev Mode, Adobe CC, AI Rapid Prototyping (v0, Claude Artifacts, Figma AI), Interactive Prototyping

Education

Lebanese American University (LAU) - Graphic Design (B.A.)

Lebanese International University (LIU) - Computer Science (B.S.)
