

Yehya Moustafa

Senior Product Designer • Mobile, Web & SaaS Platforms

Location: Beirut, Lebanon (UTC+3) / **Mobile:** +96170701178

Mail: hello@yehya.site / **Portfolio:** yehya.site

Summary

Senior Product Designer with 8+ years of experience bridging elite visual aesthetics with scalable, user-centered digital products across SaaS, mobile, and web platforms. Leverages a unique dual background in Graphic Design and Computer Science to collaborate seamlessly with engineering teams, owning end-to-end execution—from UX strategy and design systems to high-fidelity UI and front-end implementation.

Experience

Numbase Group - Senior Product Designer (2024 - Present)

- Lead end-to-end product design for fintech and enterprise web platforms, optimizing core user flows to drive user engagement and platform adoption.
- Establish and govern comprehensive Figma design systems and reusable component libraries to enforce cross-platform visual consistency.
- Partner closely with product managers and engineering leads to align UX strategy with business goals and technical constraints

DS2 - Product Designer (2023 - 2024)

- Designed and delivered scalable UI/UX systems across web and marketing platforms, ensuring optimal responsive experiences on desktop and mobile devices.
- Developed interactive prototypes, user flows, and design specs to streamline developer handoff and ensure high design-to-code fidelity.
- Collaborated directly with stakeholders to translate business requirements into intuitive, modern digital interfaces.

AI Qabass - UI Designer (2018 - 2023)

- Designed end-to-end digital brand experiences and responsive web layouts for commercial and media clients.
- Established visual hierarchy systems, typography scales, and digital component libraries across multi-channel campaigns.
- Partnered with cross-functional teams to translate brand identities into high-converting digital interfaces

Freelancing — Product Design (2017 - Present)

- Partner with global startups to design end-to-end mobile and web apps, including an EdTech mobile platform that achieved 10,000+ downloads and a 4.9 Play Store rating.
- Reduced user drop-off dramatically by replacing fragmented communication channels with a structured, multi-step booking stepper.
- Evolved offerings over 8 years from brand identity to complex design systems, wireframing, interactive prototyping, and developer QA.

Core Competencies & Tools

- **Product & UX Strategy:** User Research, Problem Framing, User Flows, Information Architecture, Wireframing, Usability Testing
- **UI & Visual Design:** High-Fidelity UI, Mobile App Design (iOS & Android), Interaction Design, Accessibility, Visual Hierarchy
- **Design Systems:** Figma Component Libraries, Reusable Design Patterns, Design Token Governance, System Documentation
- **Technical Knowledge:** Working knowledge of HTML, CSS, JavaScript, Developer Handoff, QA, Technical Feasibility
- **Design & Prototyping Tools:** Figma, Adobe XD, Photoshop, Illustrator, Interactive Prototyping, AI Design Tools

Education

Lebanese American University (LAU) - Graphic Design (B.A.)

Lebanese International University (LIU) - Computer Science (B.S.)
